

JUAN CARLOS CONDORI CAVINA

Full Stack Web Developer · AI-Assisted

+591 70187866 ■ La Paz, Bolivia ■ jucaco89@gmail.com ■ [LinkedIn](#) ■ [GitHub](#) ■ [Portfolio](#)

OBJECTIVE

AI-assisted Full Stack Developer with over **10 years of experience** specializing in web development, e-commerce solutions, and modern applications. Expert in Angular, .NET, microservices and scalable architecture — skills built long before AI existed. Today I lean on tools like Claude Code and Windsurf to document projects, solve problems much faster, and make every codebase simpler and easier to understand for other developers. Currently working with React, Azure and Jenkins CI/CD pipelines, implementing automated testing (E2E, unit, coverage and load tests). Experienced in international projects for companies in the United States and Bolivia, developing CRM systems, e-commerce platforms and enterprise applications. Scrum certified with advanced English proficiency (B2 Upper Intermediate).

EDUCATION

Scrum Fundamentals Certified (SFC™), ScrumStudy.com	2022
Certification #896454 — Agile and Scrum methodologies View Certificate	
EF SET English Certificate 60/100 (B2 Upper Intermediate), EFSET.org	2023
Certification #YV8GZu — Advanced intermediate English View Certificate	
Bachelor of Computer Science, Universidad Mayor de San Andres	2009 - 2015
Teaching assistant in Databases for 3 years	

SKILLS

Frontend:	Angular 16, React, Android (Java), PrimeNG, TypeScript, JavaScript, HTML5, CSS3, Bootstrap 5, i18n
Backend:	.NET, Node.js, Slim PHP, PHP, PostgreSQL, MySQL, MongoDB, Redis, SQL Server, Kafka, REST APIs, Microservices, OsCommerce
Tools & DevOps:	Git, Jenkins, Azure, CI/CD, Claude Code, Windsurf, Scrum, Agile, CRM, E-commerce, WebServices, Magento 2
Soft Skills:	Leadership, Self-taught, Quick learner, Problem solver
Languages:	Spanish (Native), English (B2 Upper Intermediate)

EXPERIENCE

Full Stack Developer (.NET, Angular, React)	2024 – Present
ContactUs, Ohio, US (Remote)	
• Development of 20+ .NET backend microservices and 3 frontend applications (Angular, React). • Cross-platform application for iOS, Android, Windows and PWA built with React; single shared codebase. • Automated testing strategy: E2E, unit, coverage and load tests. • AI-assisted development with Windsurf and Claude Code to solve problems, ship features and document projects much faster. • CI/CD pipelines with Jenkins across 5 environments (dev, stg, uat, auto, prd) on Azure.	
Fullstack Consultant (Slim PHP, Angular, PostgreSQL, Kafka)	2024 (5 months)
Vicepresidencia del Estado Plurinacional de Bolivia, La Paz, BO	
• Extension of the TOKAPU state system — developed a sales and inventory module for the Vice-Presidency library. • Backend with Slim PHP, PostgreSQL and Redis for caching; Kafka as message broker. • Frontend built with Angular and PrimeNG component library. • Consulting role integrating the new module into existing government infrastructure.	
Full Stack Developer (.NET, Microservices, Angular, React)	Apr 2022 – May 2024
MotionCX, Columbus Ohio, US (Remote)	
• Development and addition of new endpoints in microservices using .NET. • Development and addition of new functionalities in the web client using Angular. • Development and addition of new functionalities in the desktop client using React.	

- Implementation of screen recording functionality for application in React.
- Code versioning and management of different environments through Continuous Delivery (CD).
- Documentation and management of new features using JIRA and GitHub.

Full Stack Developer (CRM, Angular, WebServices)

Sep 2021 – Dec 2021

Grupo Empresarial LaFuente, Santa Cruz, BO (Remote)

- Development of landing pages integrated to SugarCRM using Angular and REST services.
- Development of custom REST services on SugarCRM using MySQL procedures.
- Customization of modules within SugarCRM using Angular and REST services.
- Deploying to test and production environments of all modules and services developed.

Backend Developer (Slim PHP, Angular, WebServices)

Mar 2021 – Aug 2021

CEASS, La Paz, BO (On-site)

- Redesign of the database of the institution's previous inventory and sales system.
- Development of REST services using SLIM PHP for the implementation of the new inventory system.
- Coordination through POSTMAN for elaborating, correcting, and implementing new REST services.

Full Stack Developer (Slim PHP, Angular, WebServices)

Jun 2020 – Feb 2021

AGEMED, La Paz, BO (Hybrid)

- Development of reactive forms for new modules in Angular.
- Development of REST services for new modules in SLIM PHP.
- Update of the institutional page with CMS technologies.
- Implementation of service for sending push notifications to users.

E-commerce Project Manager

Nov 2017 – May 2020

HANSA Ltda., La Paz, BO (Hybrid)

- Evaluation of online sales system and proposal of a new solution using Magento open source.
- Implementation and configuration of Magento 2 on CentOS 7 server.
- Migration of products, categories, and attributes from the previous system.
- Magento integration with CRM, ERP, and Data Warehouse for sales flow and credit limits.
- Customization of checkout module and B2B functionality via vendor plugin.

E-commerce Developer (OsCommerce, Android, Payment Gateways)

Feb 2015 – Mar 2017

LatinAmericanMalls, La Paz, BO (On-site)

- Development and customization of e-commerce platform using OsCommerce (PHP / MySQL).
- Built Android application with Android Studio and Java, integrated via REST APIs.
- Implementation of payment gateways: Braintree and PayPal.
- Preparation of monthly sales reports and migration of hosting and databases.

PROJECTS

Personal Angular Portfolio. Personal bilingual portfolio with Angular 16, i18n, animations and GitHub Pages deployment. (Angular 16, TypeScript, i18n, Animate.css) [\[Demo\]](#) [\[Code\]](#)

QuickyTools. Collection of useful web tools developed with Astro, TypeScript and TailwindCSS. (Astro, TypeScript, TailwindCSS, i18n) [\[Live Web\]](#)

E-commerce Website (HANSA). E-commerce platform for HANSA Bolivia, developed with Magento 2, PHP and MySQL. B2C and B2B coverage, integrated with CRM and ERP through REST services. (Magento 2, PHP, MySQL) [\[Live Web\]](#)

CafeResto. Web application to help restaurants and cafeterias manage their business more effectively. Includes table management, product catalog, sales reporting and order tracking. (Astro, TypeScript, TailwindCSS) [\[Demo\]](#) [\[Landing Page\]](#)

Capibara Pet for VS Code. VS Code extension with an animated capybara pet that reacts to typing, errors and coding breaks using sprite-sheet animations; zero runtime dependencies, published on the Visual Studio Marketplace. (TypeScript, VS Code API, Webview) [\[Marketplace\]](#) [\[Code\]](#)
